

Joint Technical Solutions, an AI Signal Research Inc. and Astrion Joint Venture, Secures \$910 Million Army T&E Contract

HUNTSVILLE, Ala., February 28, 2024 – Today, the Joint Technical Solutions (JTS) Joint Venture (JV) with AI Signal Research Inc. (ASRI) and Engineering Research and Consulting (d/b/a Astrion Group) (Astrion) announced it has secured the Redstone Test and Engineering Services (RTES) contract by the United States Army Contracting Command in support of the U.S. Army Test and Evaluation command. The \$910 million contract with JTS will provide engineering and support services for the U.S. Army Redstone Test Center (RTC) at Redstone Arsenal in Huntsville, Alabama.

“JTS brings personnel who are experienced in all aspects of weapon and aviation system test and evaluation from components to subsystem, to system, to systems of systems, to every aspect of the program management and analysis effort necessary to successfully support the RTC mission”, stated Anthony Jones, ASRI CEO and JTS Managing Partner.

ASRI and Astrion will provide comprehensive support across missile, aviation, and associated technologies to ensure the delivery of safe and effective combat weapon system capabilities to the U.S. Army.

“This is an outstanding opportunity for ASRI and our joint venture with Astrion to enable the Redstone Test Center in continuing a legacy of mission excellence for the US Army. We meticulously worked to put together the right team and approach to meet the customer’s requirements today and into the future”, noted Bill Colson, ASRI President.

About JTS

JTS is a Small Business Administration (SBA)-approved All Small Program Mentor-Protégé Joint Venture (JV) between AI Signal Research, Inc. (Protégé) and Engineering Research and Consulting (ERC), now doing business as Astrion Group (Mentor). For more information and career opportunities, visit www.jts-jv.com.

About ASRI

ASRI, is a mature small business headquartered in Huntsville, Alabama. ASRI provides quality technical, operations, programmatic, and advanced data analysis technology solutions across the weapon systems acquisition life cycle with emphasis on supporting systems test and evaluation, engineering, research, and development. ASRI's customers include Department of Defense organizations (Army, Navy and Air Force) as well as NASA. ASRI has a long-standing legacy of technical, engineering, and management excellence specializing in systems test & evaluation for over 30 years dating back to the company formation in 1990.
